

PROTEC™ BAT LIGHT

ITEM # 5904

PROTEC™ BAT Light™ is a high-powered tactical light that uses a CREE® XRE LED to produce 200 lumens of bright white light. Light of this magnitude is enough to dominate an aggressor's night adapted vision, ideal for military, law enforcement, and self-defense. (NOTE: Anything above 50 lumens within a 10 yard distance may cause temporary blindness when viewed directly.) The high-powered LED is recessed into the head of the light to protect against those accidental drops. The BAT Light™ has 3 lighting modes: 100% light (200 lumens,) 50% light (100 lumens) and Defensive Strobe (200 lumens.) The water-resistant body is constructed from aircraft grade anodized aluminum. The bat-like design provides comfort when in use and allows for more control over the flashlight. An ergonomic textured handle provides a non-slip grip. The On-Off button is located at the base of the handle for convenient one-handed operation. Also included is a lanyard that attaches to the base to keep this light handy.

Features:

- High Powered 200 Lumen LED
- Light Travels Over 100 Yards
- Aircraft Grade Anodized Aluminum
- Water-Resistant
- 4 AA Batteries Included

The On-Off switch located at the base of the handle for convenient operation.

Product Dimension: 16.25" x 1.25"
